## PROJECTS

---

### Vaccination Booking System | Spring Boot, JPA/Hibernate, Java, MySQL

July 2023

- Developed and maintained a secure and scalable API based back-end project for booking vaccination, ensuring smooth communication between backend applications and the database.
- Implemented RESTful endpoints for appointment management, real-time data updates, and user authentication.
- Documented the APIs via Swagger. Project has the facility of real-time email send.

### Shopyverse | Spring Boot, JPA/Hibernate, Java, MySQL

Aug 2023

- Developed a unified eCommerce platform, seamlessly merging product management, order processing, and user interactions for a cohesive and efficient shopping experience
- Consists of RESTful APIs, utilizing Swagger documentation to ensure clear API communication, and incorporated automated email notifications for enhanced user engagement and order updates.

### Portfolio Website | React, HTML, CSS, JavaScript

Feb 2023

- Developed a responsive portfolio website showcasing personal projects, skills and experience.
- Designed interactive features like dynamic image sliders and project galleries, highlighting proficiency in React.js and UI/UX principles.
- Visitors have the convenience of exploring my social media profiles, reaching out with their inquiries, and directly accessing my resume.
